DETAILED ACTION

Election/Restrictions

1. Claims 12-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 8/2/07.
2. Applicant's election with traverse of the invention of claims 1-11 in the reply filed on 8/2/07 is acknowledged. The traversal is on the ground(s) that the identified claim groupings are neither independent nor distinct rather **are drawn to particular embodiments** of the disclosed method of communicating this is not found persuasive because no particular embodiments of the method of communicating are disclosed. The specification, at page 4, lines 22-23, teaches the transmission and reception of data as part of one embodiment. However, the invention of group 1 includes claims directed to the **method transmitting data** and the invention of group two relates to a **method of receiving data**, which are two independent and two distinct embodiment. As per the classification schedule, of class 375 each of such invention is classified in different subclasses (see restriction requirement). Accordingly, the requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 2611

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 recites only a single step “transmitting” without any additional **steps delimiting** how its use is actually practiced. Note that method claims should set forth **a series of steps** in the active tense in an instruction-like manner thereby reciting an actual method. Dependent claims (if applicable) should further limit base claims by reciting additional method steps in a likewise fashion. Ex parte Erlich 3UPQ2d 1011 at 1017[6].

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A goal to a “wireless communication” is set forth in the preamble of claim 1. However, the body of the claim **only** recites “**transmitting data**”. Such limitation is not consistent with the specification that teaches at page 4, lines 22-24 that “communicating” corresponds with “**transmission and reception of data**”. The limitation “in response to the available Walsh code orthogonally rules” recited

in claim 9 renders the claim vague and indefinite because it is unclear as to what “orthogonally rules” the claim refers to.

Claim Objections

7. Claims 2-11 are objected to because of the following informalities: Claim 2, recites “step of” should be deleted so as to be consistent with antecedent in claim 1 that recites only “calculating”. Claim 6, line 4, “said” should be inserted before “at”. Claim 11, line 2 please define RC3 and RC4. Note that any claim whose base claim is objected is likewise objected. Appropriate correction is required.

Drawings

8. The drawings are objected to because please place the reference numbers outside of each box with each reference number having an indicator pointing to its corresponding drawing box. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after

Art Unit: 2611

the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

9. Claims 2-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
